| Risk Of Harm              | Slips, Trips & Falls                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Existing Control Measures | <ol style="list-style-type: none"> <li>1. Uneven surfaces – The risk of these can be reduced by providing walkways that are clearly designated as walkways, having good conditions underfoot, and being well lit.</li> <li>2. Obstacles – Instances of slipping and tripping over obstacles can be dramatically reduced by everyone keeping their work and storage areas tidy and designating specific areas for waste collection</li> <li>3. Wet or slippery surfaces – If a surface is slippery with mud it should be treated with stone, and if it is slippery with ice it should be treated with grit. Any areas that are slippery should be signposted. Ensure you stick to marked walkways when onsite to avoid trips and slips.</li> <li>4. Trailing cables – Cordless tools should be used where possible. If this is not possible, cables should be run at high levels.</li> <li>5. Report any unsafe work areas immediately. Ensure the area worked in is left clean and tidy. Observe/Obey any site Health &amp; Safety posters/information/instruction, at all times. In the event of an accident please report to the first aider and report it to the Designer Contracts Office.</li> <li>6. If using stairs, ensure the area is clear of obstruction and always ask for assistance if required</li> </ol> |
